FIRE PROTECTION

THE GLOBAL VOICE FOR PASSIVE AND ACTIVE FIRE PROTECTION

Patterson Pump Ireland Awarded the Best Fire Fighting Pump Manufacturer 2018 award

Patterson Pump Ireland is honoured to have been awarded the Best Fire Fighting Pump Manufacturer 2018 award in the second annual Irish Enterprise Awards organised on behalf of the EU Business News.

The company view this award as a collective recognition of everyone who is associated with Patterson Pump Ireland. Employees, local suppliers, the local Chamber of Commerce, the County Council and our Parent Company, Patterson Pump Company U.S.A. based in Toccoa, Georgia all share in this award.

Recognised as a world leader in the firefighting market, the company has been successfully manufacturing firefighting pumping systems since 1999 in Mullingar, Co. Westmeath, Republic of Ireland. The company supply fire pumps domestically in Ireland and across the UK, as well as the entire European Union, Russia, Turkey, Northern Africa, Bangladesh, the Middle East and the Far East.

The company's prides itself on its knowledge and extensive experience in servicing the internationally recognised FM/UL and NFPA fire-fighting market. Patterson Pump Ireland also satisfies the Polish, the Czech Republic, Russian, Hungarian, Ukrainian, English and Irish markets with their local rules requirements such as EN12845 and non-listed markets.

Pumps are manufactured to the highest standards in each of these fire-fighting markets.

Patterson Pump Ireland offers its customers a market leading 30 months warranty from shipping / 24 months warranty from start up. There are four types of world-class Patterson pumps that are effective in fire control systems: The Horizontal Split Case, the Vertical Turbine, the Vertical in-line and the End Suction pump. All of these four pumps are manufactured at our Mullingar facility.

Patterson Pump Ireland services its customers from sales to order entry, to manufacturing and testing, to shipping and on-site commissioning.

Patterson Pump Ireland pump sets operate with pressures in excess of 34 Bar and flows up to and exceeding 18,925 LPM. Pump sets can either be driven by a diesel engine or an electric motor. Patterson pumps provides mechanical dependability, efficient operation and minimal maintenance. Simplicity of design ensures long, efficient unit life, reduced maintenance costs and minimum power consumption.

Patterson Pump Ireland offers pumps for booster sets, mobile fire-fighting units and their famous pre-packaged fire pump houses and open skids. Clients over the years have included Facebook, Glaxo Smith Kline, British Petroleum, Shell Oil, Amazon, Abbott Pharmaceuticals, Nokia, Zanussi, PepsiCo and Coca Cola

to name a few. Clients also include fire sprinkler contractors, high tech engineering companies and consultancy engineering companies throughout our markets.

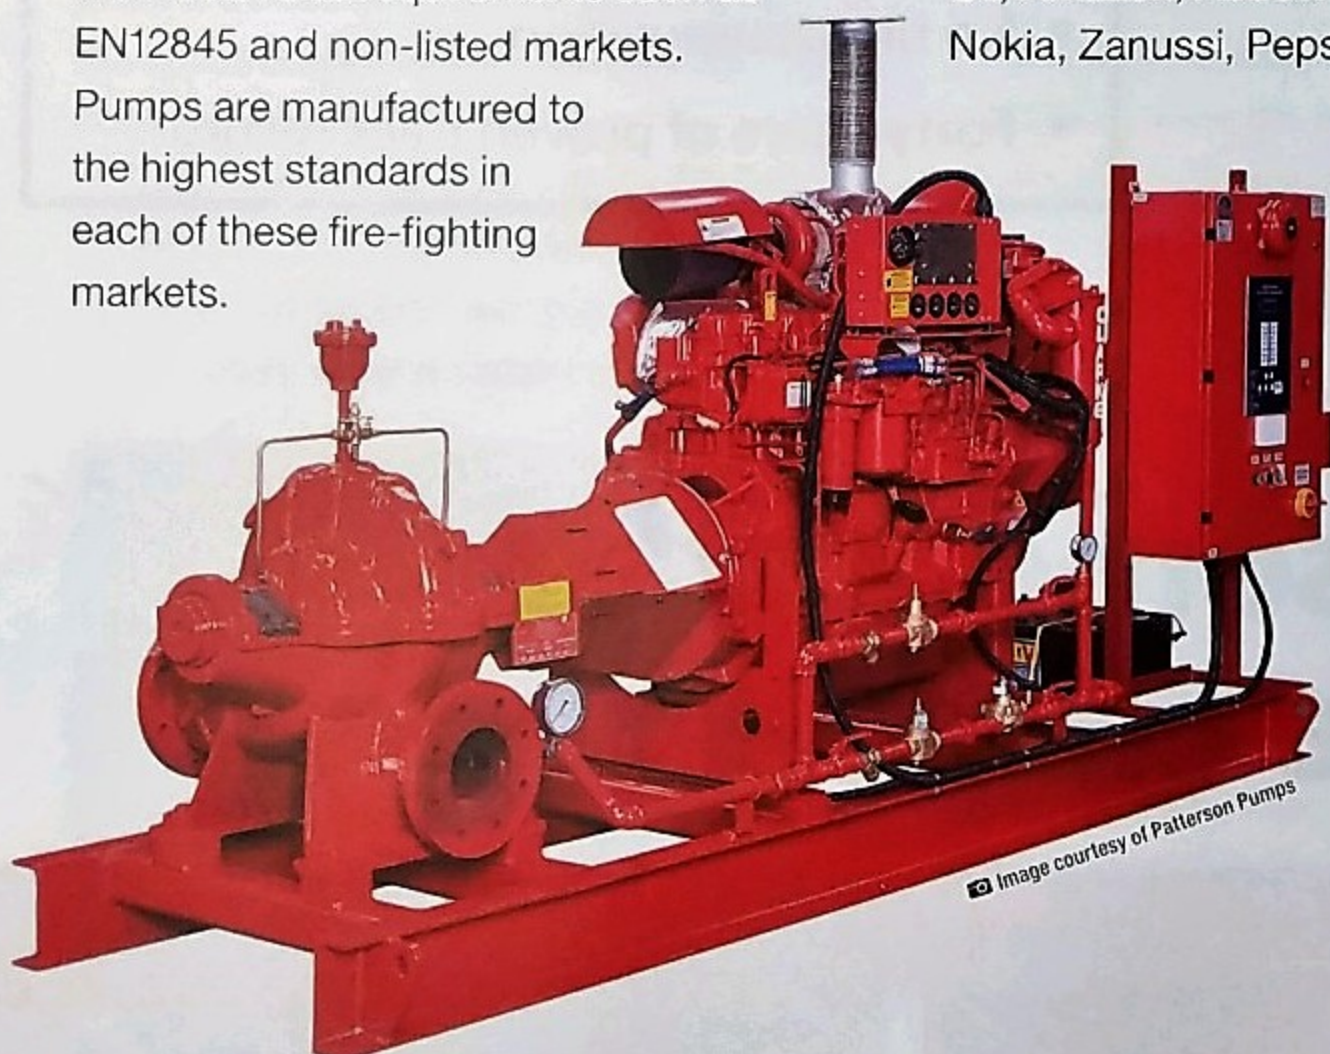

Patterson Pump Ireland is unique because they offer a personal touch. The online web submission forms lead to a dedicated person responding to the client by picking up the phone and speaking to the customer about a product so they can get it right the first time.

A dedicated engineering team constantly supply all clients with technical drawings, data sheets on diesel engines, electric motors, controllers and other ancillary equipment. The company engineer and produce a bespoke product to the customer's specifications. Engineers have the experience to assist on installation requirements and will attend technical meetings anywhere, if so required.

Patterson Ireland offers a sales and service network across Europe, the Middle East, Bangladesh and North Africa through a network of representatives for sales, service and after sales. Customers turn to Patterson Pump because they know the company will go the extra step to help them 24/7, 365 days a year.

Patterson Pump Ireland is well known for its design, engineering, and construction of a pre-packaged fire pump house. Increasing costs and the time scale to carry out the construction and fitting out of conventional buildings are being seriously challenged by pre-packaged fire pump houses manufactured by fire pump manufacturers.

The distinct benefit of the pre-packaged pump house is its single source responsibility which Patterson Ireland fully designs, manufactures and tests within their facility. This ensures all the equipment included in the pump house is fully coordinated. Upon arrival at the job site the pump house is ready to be put into service within hours of arrival.
